

**BRISTOL GATE CONCENTRATED US EQUITY ETF
INTERIM UNAUDITED FINANCIAL STATEMENTS
JUNE 30, 2021**

MANAGER’S RESPONSIBILITY FOR FINANCIAL REPORTING

The accompanying Interim Financial Statements of Bristol Gate Concentrated US Equity ETF (the “ETF”) are prepared by Bristol Gate Capital Partners Inc., the Manager to the ETF, and approved by the Board of Directors of Bristol Gate Capital Partners Inc., as Trustee of Bristol Gate Concentrated US Equity ETF.

The Manager is responsible for the management and control of the day-to-day affairs of the ETF. The Manager performs administrative functions including maintaining controls over financial reporting. The Manager maintains appropriate processes to ensure that relevant and reliable financial information is produced. The financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”). The basis of presentation of the financial statements is described in Notes to the financial statements.

Bristol Gate Concentrated US Equity ETF
Notes to the Interim Financial Statements
For the period ended June 30, 2021 (unaudited)

1. Establishment of the ETF

The Bristol Gate Concentrated US Equity ETF (the “ETF”) is an unincorporated open-ended mutual fund trust under the laws of the Province of Ontario, which is authorized to issue an unlimited number of redeemable, transferable units. The ETF is established pursuant to a declaration of trust dated February 8, 2018, as the same may be amended or restated from time to time. The ETF is managed by Bristol Gate Capital Partners Inc. (the “Manager”). The ETF’s registered address is located at 45 St. Clair Avenue West, Suite 601, Toronto, Ontario M4V 1K9. RBC Investor Services Trust acts as custodian (the “Custodian”) and administrator (the “Administrator”) of the ETF and Bristol Gate Capital Partners Inc. acts as trustee (the “Trustee”). The ETF commenced operations on February 8, 2018. The Financial Statements were authorized for issuance by the Manager on August 19, 2021.

The ETF is currently offered in Canadian-dollar-denominated units (the “CAD Units”) and U.S.-dollar-denominated units (the “USD Units”). An unlimited number of units may be issued.

The fundamental investment objective of the ETF is to generate long-term growth of income and capital by investing primarily in a concentrated portfolio of publicly-traded equity securities of U.S. companies that pay a dividend. In order to achieve its investment objective, the ETF invests in dividend-paying equity securities selected primarily from the S&P500® Index.

Statement of Compliance and Basis of Presentation

These financial statements (the “financial statements”) have been prepared in compliance with International Accounting Standard 34 Interim Financial Reporting (“IAS 34”).

The financial statements are presented in Canadian dollars, which is the ETF’s functional currency. The ETF has issued CAD Units and USD Units and maintains the capital accounts of these two unit pools in Canadian dollars. The income and expenses of the ETF on a daily basis are divided between the two unit pools based on their capital accounts in Canadian dollars and the USD Units net asset value per unit (NAVPU) is calculated daily in Canadian dollars and converted to US dollars based on the rate of exchange at the end of the day. This NAVPU in U.S. dollars is used for subscriptions and redemptions of the USD Units.

These financial statements are prepared on a going concern basis using the historical cost basis, except for investments that have been measured at fair value.

2. Significant Accounting Policies

(a) Financial Instruments Classification and Measurement

Classification and measurement categories under Financial Instruments (“IFRS 9”) are amortized cost, fair value through other comprehensive income (FVOCI), and fair value through profit or loss (FVTPL). To determine the appropriate classification and measurement category, IFRS 9 requires an entity to consider the business model for managing financial instruments and the contractual cash flow characteristics associated with the financial instruments.

The ETF’s business model is one in which financial assets are managed with the objective of realizing cash flows through the sale of assets. Decisions are made based on the assets’ fair values and assets are managed to realize these fair values. This business model is aligned with a FVTPL classification and measurement category. Debt securities are measured at FVTPL under IFRS 9 as the ETF does not expect to hold the assets to collect contractual cash flows based on its business model.

Bristol Gate Concentrated US Equity ETF
Notes to the Interim Financial Statements
For the period ended June 30, 2021 (unaudited)

Collection of the contractual cash flows is not integral to achieving the ETF's business model objective but is instead incidental to it.

Other receivables are held to collect contractual cash flows and are expected to give rise to cash flows representing solely payments of principal. Thus, the ETF measures trade receivables at amortized cost under IFRS 9. All other financial assets and liabilities are carried at amortized cost.

(b) Impairment

IFRS 9 introduced the expected credit loss model ("ECL") as the new impairment model for financial assets measured at amortized cost. At each reporting date, the ETF measures the loss allowance on accrued income and other short term receivables at an amount equal to the lifetime expected credit losses if the credit risk has increased significantly since initial recognition. If, at the reporting date, the credit risk has not increased significantly since initial recognition, the ETF measures the loss allowance at an amount equal to the 12 month expected credit losses. Given the short-term nature of the receivables and the high credit quality, the ETF has determined that the expected credit loss allowances are not material.

(c) Recognition

The ETF's financial instruments include investments at FVTPL, cash, subscriptions receivable, dividends receivable, other receivables and due to manager. All financial assets and liabilities are recognized in the Statement of Financial Position when the ETF becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the ETF has transferred substantially all risks and rewards of ownership.

The ETF recognizes financial instruments at fair value upon initial recognition, plus transaction costs in the case of financial instruments measured at amortized cost. Investment transactions are accounted for on the trade date. The ETF's obligation for net assets attributable to holders of redeemable units is presented at the redemption amount. The ETF's accounting policies for measuring the fair value of its investments are identical to those used in measuring its net asset value ("NAV") for transactions with unitholders, except where the last traded market price is not within the bid-ask spread.

(d) Offsetting

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. In the normal course of business, the ETF may enter into various master netting agreements or similar agreements that do not meet the criteria for offsetting in the Statement of Financial Position but still allow for the related amounts to be offset in certain circumstances, such as bankruptcy or termination of the contracts. As of June 30, 2021, no amounts have been offset in the Statement of Financial Position.

(e) Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and marketable securities) are based on quoted market prices at the close of trading on the reporting date. The ETF uses the close prices for both financial assets and financial liabilities where the close price falls within that day's bid-

Bristol Gate Concentrated US Equity ETF
Notes to the Interim Financial Statements
For the period ended June 30, 2021 (unaudited)

ask spread. In circumstances where the close price is not within the bid-ask spread, the Manager determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances. The fair value of financial assets and liabilities that are not traded in an active market, including over-the-counter derivatives, is determined using valuation techniques. The ETF may use a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and others commonly used by market participants and which make the maximum use of observable inputs. The fair value of financial instruments other than investments at fair value through profit and loss closely approximates their carrying values, given their short-term maturities.

Refer to Note 3 for further information about the ETF's fair value measurements.

(f) Foreign Currency Translation

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates that transactions occur. Foreign currency assets and liabilities are translated into the functional currency using the exchange rate prevailing at the measurement date. Realized foreign exchange gains and losses relating to cash are presented as "Foreign exchange gain (loss) on cash"; realized gains (losses) relating to other financial assets and liabilities are presented within "Realized gain (loss) on sale of investments"; and unrealized gains (losses) relating to cash and other financial assets and liabilities are presented within "Change in unrealized appreciation/(depreciation) in value of investments" all within the Statement of Comprehensive Income.

(g) Net Asset Value per unit

Units of the ETF are valued at the NAV per unit at 4pm (Toronto time) on each valuation day. A valuation day is every day that the TSX is open for business or any such other day as may be determined from time to time by the Trustee. The NAV per unit is determined by dividing the aggregate fair value of the net asset value of the series by the total number of units of that series outstanding before giving effect to redemptions or subscriptions for units on that day.

(h) Income Recognition

Interest income is recognized on an accrual basis. Dividend income is recorded on the ex-dividend date. Realized gains and losses on the sale of investments and unrealized appreciation or depreciation in the value of investments are calculated with reference to the average cost of the related investments.

(i) Transaction Costs

Transaction costs are expensed and are included in "Transaction costs" in the Statement of Comprehensive Income. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of an investment, which include fees and commission paid to agents, advisors, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. The embedded transaction costs in the cost of the investment portfolio as at June 30, 2021 are disclosed in the Schedule of Investments.

(j) Cash

Cash is comprised of short-term deposits with financial institutions.

Bristol Gate Concentrated US Equity ETF
Notes to the Interim Financial Statements
For the period ended June 30, 2021 (unaudited)

(k) Increase (decrease) in Net Assets Attributable to Holders of Redeemable Units per Unit

Increase (decrease) in net assets attributable to holders of redeemable units per unit represents the increase (decrease) in net assets divided by the weighted average number of units outstanding per series during the period.

(l) Taxation

The ETF qualifies as a mutual fund trust under the Income Tax Act (Canada). All of the ETF's net income for tax purposes and sufficient net capital gains realized in any period are required to be distributed to unitholders such that no income tax is payable by the ETF, and any distribution will be automatically reinvested in additional units. As a result, the ETF does not record income taxes. Since the ETF does not record income taxes, the tax benefit of any capital and noncapital losses has not been reflected in the Statement of Financial Position as a deferred income tax asset.

As at December 31, 2020, the ETF had \$5,613,313 of unused capital losses. The ETF currently incurs withholding taxes imposed by certain countries on investment income and capital gains. Such income and gains are recorded on a gross basis and the related withholding taxes are shown as a separate expense in the Statement of Comprehensive Income.

(m) New Standards and Interpretations Not Yet Adopted

The ETF has determined there are no new IFRS standards that are issued, but not yet effective, that could materially impact the ETF's financial statements.

(n) Critical Accounting Estimates and Judgements

The preparation of these financial statements in conformity with IFRS requires management to use judgement in applying its accounting policies and to make estimates and

assumptions about the future. These judgements, estimates and assumptions affect the reported amounts of assets and liabilities, disclosure of contingencies, as well as the reported amounts of investment income and expenses during the period.

Actual results could differ from those estimates. The most significant accounting judgements and estimates made in preparing the financial statements include the classification of financial assets and liabilities in Note 2 (a), the functional currency as disclosed in Note 1 and the classification of outstanding units as financial liabilities as disclosed in Note 4.

3. Fair Value Disclosure

The ETF's financial assets measured at fair value have been categorized based upon a fair value hierarchy. The ETF has established a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are as follows: Level 1 - Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active.

Level 3 - Inputs that are unobservable. There is little if any market activity. Inputs into the determination of fair value require significant management judgement or estimation. There were no transfers between levels for the periods ended June 30, 2021 and December 31, 2020. The ETF's policy is to recognize transfers in and out and between Levels 1 and 2 as per the value at the end of the reporting

Bristol Gate Concentrated US Equity ETF
Notes to the Interim Financial Statements
For the period ended June 30, 2021 (unaudited)

period and for transfers in and out of Level 3 as per the value at the date of transfer.

	June 30, 2021	December 31, 2020
Total value of Level 1 securities	\$188,568,717	\$147,340,201

There were no Level 2 or Level 3 securities at June 30, 2021 or December 31, 2020.

The carrying values of cash, dividends receivable, subscriptions receivable, other receivables and due to manager approximate their fair values due to their short-term nature.

As a result of COVID-19, the Manager is continuously monitoring risk associated with the pandemic, including credit and liquidity risk, as well as the fair market valuation of the ETF's investments. Please refer also to Note 9.

4. Redeemable Units

The ETF is currently offered in Canadian-dollar-denominated units and U.S.-dollar-denominated units. Unitholders may redeem units of the ETF at a redemption price per unit equal to 95% of the closing price of the units on the Exchange on the effective day of the redemption, subject to a maximum redemption price of the applicable NAV per unit.

The redeemable units of the ETF meet the criteria for classification as financial liabilities under IAS 32, Financial Instruments: Presentation as a result of the ETF's requirement to distribute net income and capital gains to unit holders.

Unit transactions of the ETF for the period ended June 30, 2021 and June 30, 2020 were as follows:

	2021	2020
Units outstanding, beginning of period	5,100,000	4,250,000
CAD Units issued, during the period	250,000	700,000
USD Units issued, during the period	700,000	250,000
CAD Units redeemed, during the period	(150,000)	(50,000)
USD Units redeemed, during the period	(100,000)	(150,000)
Units outstanding, end of period	5,800,000	5,000,000

5. Expenses

The applicable operating expenses payable, if any, by the ETF include: the management fee; transaction costs; the cost of complying with governmental or regulatory requirements introduced after the date of creation of the ETF; the fees payable to the Custodian, the Registrar and Transfer Agent, the ETF Administrator, the auditor and other service providers retained by the Manager; all other operating expenses; any goods and services or harmonized sales taxes on those expenses and any income, withholding or other taxes.

(a) Management fees

The ETF's management fee, plus applicable taxes, is paid to the Manager based on the annual rate of 0.70% of the NAV of the ETF. This management fee is calculated and accrued daily and paid on the last Valuation Date of each month or on such date as the Manager may determine.

(b) Independent Review Committee (the "IRC") fees

Each member of the IRC is paid an annual retainer of \$1,000 by the ETF to serve on the IRC. The Chair of the IRC is paid \$500 per meeting attended. The other IRC members are paid \$250 per meeting attended.

The Manager has authorized the IRC to hire Independent Review Inc. at a cost of \$7,500 plus HST per year (plus an additional fee of \$375 plus applicable taxes for each

Bristol Gate Concentrated US Equity ETF
Notes to the Interim Financial Statements
For the period ended June 30, 2021 (unaudited)

meeting required in excess of four per year). There was an additional expense of \$2,828 (June 30, 2020: \$2,216) for annual insurance premiums related to the IRC.

(c) Administration fees

The ETF pays the Administrator an administration fee, payable monthly in arrears, in an amount equal to 1/12th of 0.4 basis points of the total month-end market value of the assets including cash held in the ETF, subject to a minimum of \$2,875 per month. The ETF pays the Administrator a custodian fee, payable monthly in arrears, in an amount equal to 1/12th of 0.4 basis points of the total month-end market value of the assets including cash held in the ETF, subject to a minimum of \$417 per month. There are transaction fees of \$6 per purchase, sale, maturity, free delivery or receipt.

6. Capital Risk Management

Units issued and outstanding are considered to be the capital of the ETF. The Manager manages the capital of the ETF in accordance with the ETF's investment objectives. The ETF does not have any specific external capital requirements on the subscription of units, other than certain minimum subscription requirements.

7. Financial Risk Management

The ETF's activities expose it to various types of risks that are associated with its investment strategies, financial instruments and markets in which it invests. The risks include market risk (including other price risk, currency risk, and interest rate risk), credit risk, liquidity risk and concentration risk. These risks and related risk management practices employed by the ETF are discussed below.

The Manager seeks to minimize potential adverse effects of these risks on the ETF's performance by daily monitoring of the ETF's positions and market events. The

Manager also maintains a governance structure that oversees the ETF's investment activities and monitors compliance with the ETF's stated investment strategy, internal guidelines and securities regulations.

Market Risk

(a) Other Price Risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The investments of the ETF are subject to market fluctuations and the risks inherent in financial markets. The maximum risk resulting from financial instruments held by the ETF is determined by the fair value of the financial instruments. The Manager moderates this risk through a careful selection of securities within specified limits and through diversification of the ETF's investments. The Manager monitors the ETF's overall market positions on a daily basis.

At June 30, 2021 and December 31, 2020 the overall market exposures were as follows:

	30-Jun-21		31-Dec-20	
	Fair Value	% of Total Net Assets	Fair Value	% of Total Net Assets
Investments	\$188,568,717	99.01%	\$147,340,201	98.02%
Total market exposure	\$188,568,717	99.01%	\$147,340,201	98.02%

If equity prices on the respective stock exchanges for these securities had increased or decreased by 10% at June 30, 2021, with all other variables held constant, net assets would have increased or decreased approximately \$18,856,872 (9.90% of net assets) (December 31, 2020: \$14,734,020 or 9.80% of net assets).

In practice, the actual results may differ from this sensitivity analysis and the difference could be material.

(b) Currency risk

Currency risk is the risk that the value of financial instruments denominated in currencies, other than the functional currency of the ETF, will fluctuate due to changes in foreign exchange rates. Equities in foreign markets are exposed to currency risk as the prices denominated in foreign currencies are converted to the ETF's functional currency in determining fair value.

The ETF holds assets and liabilities, including cash and investments in equities that are denominated in currencies other than the Canadian Dollar. It is therefore exposed to currency risk, as the value of the securities denominated in other currencies fluctuate due to changes in exchange rates.

The table below summarizes the ETF's exposure to currency risks:

	30-Jun-21		31-Dec-20	
	Currency Exposure	% of Total Net Assets	Currency Exposure	% of Total Net Assets
Currency type				
United States Dollar	190,564,870	100.06%	148,803,216	98.99%

As at June 30, 2021, if the exchange rate between the Canadian Dollar and the foreign currencies the ETF is exposed to increased or decreased by 5%, with all other variables held constant, net assets would have decreased or increased, respectively, by approximately \$9,528,244 (December 31, 2020: \$7,440,161). In practice, actual results may differ from this sensitivity analysis and the difference could be material.

In accordance with the ETF's policy, the Manager monitors currency positions as part of the overall portfolio construction but does not actively manage currency positions and does not hedge currencies.

(c) Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or fair values of financial instruments. Interest rate risk arises when the ETF invests in interest-bearing financial instruments. The ETF is exposed to the risk that the value of such financial instruments will fluctuate due to changes in the prevailing levels of market interest rates.

The majority of the ETF's financial assets and liabilities are non-interest bearing at June 30, 2021 and December 31, 2020. As a result, the ETF is not subject to a significant amount of interest rate risk due to fluctuations in the prevailing level of market interest rates.

(d) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the ETF. All transactions in listed securities are settled or paid for upon delivery using approved brokers. The credit risk related to the associated receivables is considered limited, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligations.

As at June 30, 2021 and December 31, 2020 the ETF had no investments in debt instruments and/or derivatives; therefore, credit risk is considered minimal.

(e) Liquidity risk

The ETF's main liquidity risk exposure is in meeting redemption and expense requirements on a daily basis.

Notes to the Interim Financial Statements
For the period ended June 30, 2021 (unaudited)

The ETF's manager monitors cash needs on a regular basis. Liquidity risk is managed by investing the majority of the ETF's assets in investments that are traded in an active market and can be readily disposed of. In addition, the ETF aims to retain sufficient cash to maintain liquidity. The ETF's investments are considered readily realizable and highly liquid, therefore the ETF's liquidity risk is considered minimal.

As at June 30, 2021 and December 31, 2020 the ETF's liabilities are expected to be discharged within 90 days. Redeemable units are redeemable on demand at the holder's option. The ETF's liquid investments are considered to be in excess of normal redemption requirements.

(f) Concentration risk

Concentration risk arises as a result of the concentration of exposures within the same category, whether it is geographical location, product type, industry sector or counterparty type.

The following table is a summary of the ETF's concentration risk by industry classifications:

Portfolio by Industry Classification	30-Jun-21	31-Dec-20
	% of Total Net Assets	% of Total Net Assets
Information Technology	35.28	32.28
Health Care	14.01	13.31
Industrials	13.89	13.65
Consumer Discretionary	12.91	13.25
Financials	9.35	8.63
Real Estate	4.79	3.75
Materials	4.55	4.27
Communication Services	4.23	4.49
Consumer Staples	–	4.39
Other assets less liabilities	0.99	1.98
Total	100.00	100.00

8. Related parties

(a) Management fees

The ETF's investment activities are managed by Bristol Gate Capital Partners Inc. The management fees for the period ended June 30, 2021 were \$650,791, inclusive of HST (June 30, 2020: \$483,468).

(b) Due to Manager

During the period the Manager advanced various expenses on behalf of the ETF. As at June 30, 2021, the ETF owed the Manager \$83,442 (December 31, 2020: \$312) on account of these advances. The June 30, 2021 Due to Manager balance also includes \$132,347 of management fees (December 31, 2020: \$12,555).

(c) Unit transactions with related parties

Officers, directors and related entities of the Manager invest in units of the ETF from time to time in the normal

course of business on the same basis as arms-length investors. As at June 30, 2021, the Manager, including officers and directors, owned 27,811 units of the ETF (December 31, 2020: 27,439).

9. COVID-19

Governments worldwide have enacted emergency measures to combat the spread of a novel strain of coronavirus (COVID-19). These measures, which include the implementation of travel bans, closing of non-essential businesses, self-imposed quarantine periods and social distancing, have caused significant volatility in global equity markets and material disruptions to businesses globally resulting in an economic slowdown. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions.

The duration of the COVID-19 global pandemic is unknown at this time, but it is likely to have an ongoing effect on the financial markets where the Fund operates. It is possible that market volatility related to COVID-19 could be in excess of the sensitivities disclosed in the notes to the financial statements.

10. Auditor's Review

These interim financial statements as at June 30, 2021 were not reviewed by the Fund's auditors.
