

BRISTOL GATE US EQUITY STRATEGY

ABOUT BRISTOL GATE

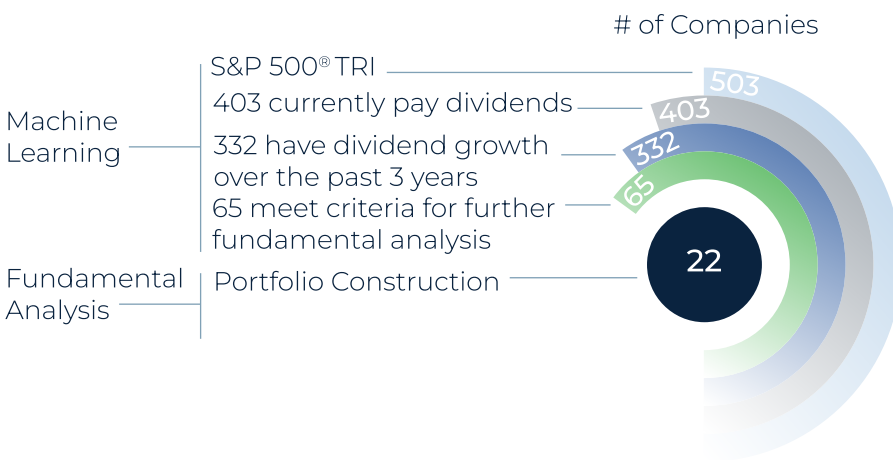

As at March 31, 2026

Bristol Gate is a Toronto-based Investment Manager that combines fundamental analysis with data science to identify companies with the highest predicted dividend growth over the next 12 months. Bristol Gate uses machine learning and other data science techniques in constructing portfolios aimed at reducing risk and improving returns while avoiding emotional bias in the investment process. Bristol Gate was founded in 2006 and is a privately owned company

OBJECTIVE

The Bristol Gate US Equity Strategy seeks to generate long-term growth of income and capital by investing primarily in a concentrated portfolio of publicly traded equity securities of U.S. companies that pay a dividend.

HOW WE FIND THE BEST DIVIDEND GROWTH

HIGHLIGHTS

- 22 positions.
- Rebalanced to an equally weighted model, generally quarterly.
- Proprietary methodology uses Machine Learning to predict the highest dividend growers looking forward over the next 12 months.
- The dividend hurdle rate is set annually. If a portfolio company falls below the dividend hurdle rate, a full due-diligence process on the company will be triggered.

HOW DATA SCIENCE FITS INTO THE INVESTMENT PROCESS

WHY WE ARE DIFFERENT

- Concentrated portfolio of the highest predicted dividend growers in the S&P 500[®] TRI
- Truly active management with high Active Share
- Measureable reduction in downside risk

DISCLAIMERS

There is a risk of loss inherent in any investment; past performance is not indicative of future results. Prospective and existing investors in Bristol Gate's pooled funds or ETF funds should refer to the fund's offering documents which outline the risk factors associated with a decision to invest. Separately managed account clients should refer to disclosure documents provided which outline risks of investing. Pursuant to SEC regulations, a description of risks associated with Bristol Gate's strategies is also contained in Bristol Gate's Form ADV Part 2A located at www.bristolgate.com/regulatory-documents.

Strategy returns in this factsheet refer to the Bristol Gate US Equity Strategy Composite (the "Composite"), which consists of equities of publicly traded, dividend paying US companies. The Composite is valued in US Dollars and for comparison purposes is measured against the S&P 500 Total Return Index. The composite's Investment Advisor, Bristol Gate Capital Partners Inc., defines itself as a portfolio manager, exempt market dealer and investment fund manager (as per its registration in Ontario, its principal regulator in Canada) and is also a Registered Investment Adviser with the U.S. Securities and Exchange Commission. The Investment Advisor's objective is to select companies with positive dividend growth, and which collectively will generate over the long term a growing income and capital appreciation for investors. The inception date of the Composite is May 15, 2009. The US Dollar is the currency used to measure performance, which is presented on a gross and net basis and includes the reinvestment of investment income. The composite's gross return is gross of withholding tax prior to January 1, 2017 and is net of withholding tax thereafter. Net returns are calculated by reducing the gross returns by the maximum management fee charged by Bristol Gate of 1%, applied monthly. Actual investment advisory fees incurred by clients may vary. There is the opportunity for the use of leverage up to 30% of the net asset value of the underlying investments using a margin account at the prime broker. Thus far no material leverage has been utilized. An investor's actual returns may be reduced by management fees, performance fees, and other operating expenses that may be incurred because of the management of the composite. A performance fee may also be charged on some accounts and funds managed by the firm. Bristol Gate claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. To obtain a GIPS Composite Report, please email us at info@bristolgate.com.

The information contained herein is obtained from multiple sources that are believed to be reliable. However, such information may not have been verified, and may be different from the information included in documents and materials created by a sponsor firm in whose investment program a client participates. Some sponsor firms may require that these Bristol Gate materials are preceded or accompanied by investment profiles or other documents or materials prepared by such sponsor firms, which will be provided upon a client's request. There may be discrepancies between Bristol Gate's performance returns and the returns included in a sponsor firm's profile document (for example, but not limited to, differences in account size/type, portfolio management strategies, the number of securities held, average account size, inclusion of institutional or mutual fund accounts, etc.) For additional information, documents and/or materials, please speak to your Financial Advisor.

This document is for illustrative and information purposes only and should not be construed under any circumstances as a public offering to buy or sell securities in any jurisdiction in which an offer or solicitation is not authorized. No representations or warranties of any kind are intended or should be inferred with respect to the economic return or the tax implications of any investment in a Bristol Gate fund.

The S&P 500® Total Return Index (S&P 500® TRI) measures the performance of the broad US equity market, including dividend re-investment, in US dollars. This index is provided for information only and comparisons to the index have limitations. The benchmark is an appropriate standard against which the performance of the strategy can be measured over longer time periods as it represents the primary investment universe from which Bristol Gate selects securities. However, Bristol Gate's portfolio construction process differs materially from that of the benchmark and the securities selected for inclusion in the strategy are not influenced by the composition of the benchmark. For example, the strategy is a concentrated portfolio of approximately equally weighted dividend-paying equity securities, rebalanced quarterly whereas the benchmark is a broad stock index (including both dividend and non-dividend paying equities) that is market capitalization weighted. As such, strategy performance deviations relative to the benchmark may be significant, particularly over shorter time periods. The strategy has concentrated investments in a limited number of companies; as a result, a change in one security's value may have a more significant effect on the strategy's value.

DISCLAIMERS (continued)

In addition to strategy's benchmark described above, the following additional index data is presented for information purposes only and comparisons to this index has limitations: S&P 500® Dividend Aristocrats® Total Return Index measures the performance of a subset of S&P 500® Index companies that have increased their dividends every year for the last 25 consecutive years. This index focuses on historical dividend growth, whereas Bristol Gate's US Equity strategy's securities are selected based on future dividend growth.

State Street® SPDR® S&P 500® ETF Trust (SPY US) sourced from Bloomberg has been used as a proxy for the S&P 500® Total Return Index for the purpose of providing some of the non-return based portfolio statistics and sector weightings in this factsheet. SPY US is an ETF that seeks to provide investment results that, before expenses, correspond generally to the price and yield performance of the S&P 500® Index.
